Venue Safety Check List Pre-event Issues to Review

- Venue floor plans
- Fire exits
- Fire extinguishers
- Fire alarm pull stations
- Open aisle ways and protected obstacles (wires)
- Evacuation plans

BOSTONCOACH[®]

General Safety Guidelines During an Emergency

- Stay away from windows
- Stay away from large objects that can fall
- Do not use elevators, only use the stairs
- If told to evacuate, do not return to the building until it is declared safe by the proper authorities
- For earthquakes – know your options
- For fires – know the drill

The Incident Command System

- Incident Command System (ICS) is used to manage emergency incidents and non-emergency events
 - Effective for large and small events
 - Flexible (can grow or shrink as required)
 - Sections may be subdivided as required
 - Cost-effective and efficient

FOR EVENT PLANNERS

The Incident Command System

- Every event should have an emergency preparedness oral or written Incident Action Plan (IAP)
- The IAP provides incident supervisory personnel with direction for expected response to anticipated incidents
- Planning must be done far enough in advance to ensure requested resources are available for the event

Accessing Security Vulnerabilities

- The threat
- Planning
- Cost vs. risk
- Integration of security and public safety

BOSTONCOACH[®]

EMERGENCY PREPAREDNESS
FOR EVENT PLANNERS

Planning Considerations Attendees

- Specific attendees (dignitaries) at the event
- VBEID – Academy Awards, Emmys, etc.
- Iconic relationships
- World activity vs. special event
- Media interest – live telecasts
- National special security event (recent DNC and RNC national events)
- Local events – law and fire and Unified Command
- Invited vs. non-invited guests

Planning Considerations Operational Issues

- The event itself (mass gatherings)
- Venue location
- Crowd management
- Labor/management issues
- Active shooter
- Pedestrian IED
- Multiple incidents occurring simultaneously
- Bomb threats/suspicious devices
- Venue “private” security
- Employee screening
- Managing volunteers
- Magnetometers
- Ticketing (counterfeiting)
- Evacuation – fire, disaster, etc.
- Physical barriers
- Checkpoints

Cost vs. Risk Getting the Balance Right

- How much security is enough?
- No 100% security
- Security – subtle vs. overt
- Nothing happened before so why increase security now?

Integration: Security and Public Safety

- Permits
- Fire authority
- Security
- Public safety
- Community (sometimes)
